As an NYU patron, I want to be able to filter my search results by the collection "Spatial Data Repository" and the collection "ESRI," so that I can home in on the GIS datasets that I am interested in.

Acceptance Criteria
- There is a facet labeled "Collection"
- SDR metadata has records with "collection" values for "Spatial Data Repository" and "ESRI"
- Filtering on these values yields the relevant results (A intersection B)
Spatial Data Repository

NYU GIS Services and Spatial Data Resources

Accessing Spatial Data

There are two ways to access data from the Spatial Data Repository:

Option 1: Download zip-files via web

Download the data directly by clicking on the download links found on this webpage. The .shp files will be downloaded as a .zip file.

Option 2: Database Connection via ArcGIS Software
