caveat:
Nobody else wanted to join the panel...and I don’t know how I wound up on the panel in the first place.
BUT!
I’ve got thoughts and experience to share

AND!
I think you all have thoughts and experiences to share, so let’s make this a...
discussion
Some Definitions

Administrative Set
An Administrative Set is a top-level grouping of Works that is managed by a user with administrative privileges, such as reviewing deposited Works before they are made accessible. Example: Electronic Dissertations and Theses.

Workflows
Workflows can be used in conjunction with and Admin Set to dictate the process by which a work becomes published. For example, Senior Honors Theses need to be reviewed and approved by advisors before becoming available to the general public in the repository.

Work Type
Helps define some of the features and behaviors of a deposited work. Differentiation among types allows repository managers to provide different user experiences based on the type of the work. For instance, the “ETD” work type may have a remarkably different UI or different metadata than the “Time-Based Media” work type. Every work has one and only one type.

Work Type
what are we doing at OSU?
let's talk about relationships

“What does that tab even mean?”

- everyone who uses our system
here’s a thing we tried

Lock down and hide relationships tab to remove depositor meddling
and here is a list...

- Oregon Wine Research Institute
- Extension and Experiment Station Publications
- National Network of Renewable Energy Centers
- Oregon Sea Grant
- Bioresource Research Minor Program Reports
- Facilities Services Reports
- Registrar - Course Catalogs
- Department of Mathematics Undergraduate Theses
- International Institute of Fisheries Economics and Trade Proceedings
- President’s Office Addresses
- Celebration of Undergraduate Education Research Posters
- ...

of all of the work types we’d need to do this
What about Resource Types?
Again...roll your own.

- Resource Type is a default metadata field
- Multiple selection is OK!
- Is this the SAME as Work Type?

- Article
- Audio
- Book
- Conference Proceeding
- Dataset
- Dissertation
- Image
- Map or Cartographic Material
- Masters Thesis
- Part of Book
- Research Paper
- Software or Program Code
- Video
Workflows
Let’s Take a Look
ew, let’s try this one
Workflow Issues

- **Warning:** if the workflow file is well-formed hyrax will pretty much use it
- **Pitfall:** your workflow might not do what you think it’s doing
- **Diagram It**
- **Test It**
unceremonious last slide and time for discussion or whatever
