# Hyku

A multi-tenant, ready-to-ship  
Samvera implementation

NOTCH8

---

# Intro to Hyku

---

- ❖ Hyku is a turn-key, pre-generated Samvera application built using Hyrax, with many default choices already in place.
- ❖ The result of the IMLS grant-funded Hydra-in-a-Box project, spearheaded by Stanford University, the DPLA, and DuraSpace.

---

# Updates & Development

---

- ❖ Promoted out of Samvera Labs in February 2019
- ❖ Ubiquity Press + British Library
  - ❖ Shared repositories for British Library, British Museum, Tate Galleries, et al.
- ❖ CoSector w/ University of London + King's Fund Digital Archive
  - ❖ IIF and Universal Viewer support contributions

---

# Updates & Development

---

- ❖ Notch8 + NYC Dept. of Records and Information Services (DORIS)
  - ❖ Bug fixes & improved single-tenant version
- ❖ Notch8 + PALNI/PALCI
  - ❖ Additional theme customization
  - ❖ Improved user management

---

# Updates & Development

---

- ❖ Notch8 rolling out HykuUP hosting service in June 2019
- ❖ Hyku Interest Group - Hyku Roadmap
- ❖ Consolidating & refreshing web presence in progress
- ❖ Hyku Mailing List: <https://groups.google.com/forum/#!forum/samvera-hyku>

# In Development...

- ❖ **Bulk Import/Export**
  - ❖ Create the ability for bulk content ingest through an automated process
- ❖ **Expansion of Work Types**
  - ❖ Expanding number of available work types and custom view ability per tenant

---
