Deploying a custom Hyrax on Azure with Terraform and Kubernetes from a standing start

-Julie ~~Rory~~ McNicholl

Docker Images deployed to a ...
Kubernetes Cluster hosted on ...
Azure Cloud Services built using
Terraform Infrastructure Creation

Azure Resource Group

Azure Automation Account

Azure Log Analytics Workspace

Azure Kubernetes Cluster

fcrepo

postgresdb

solr

app_web

app_worker

redis

Azure Storage Account

Azure Storage: Files

Azure Storage: Files

Azure Managed Disk

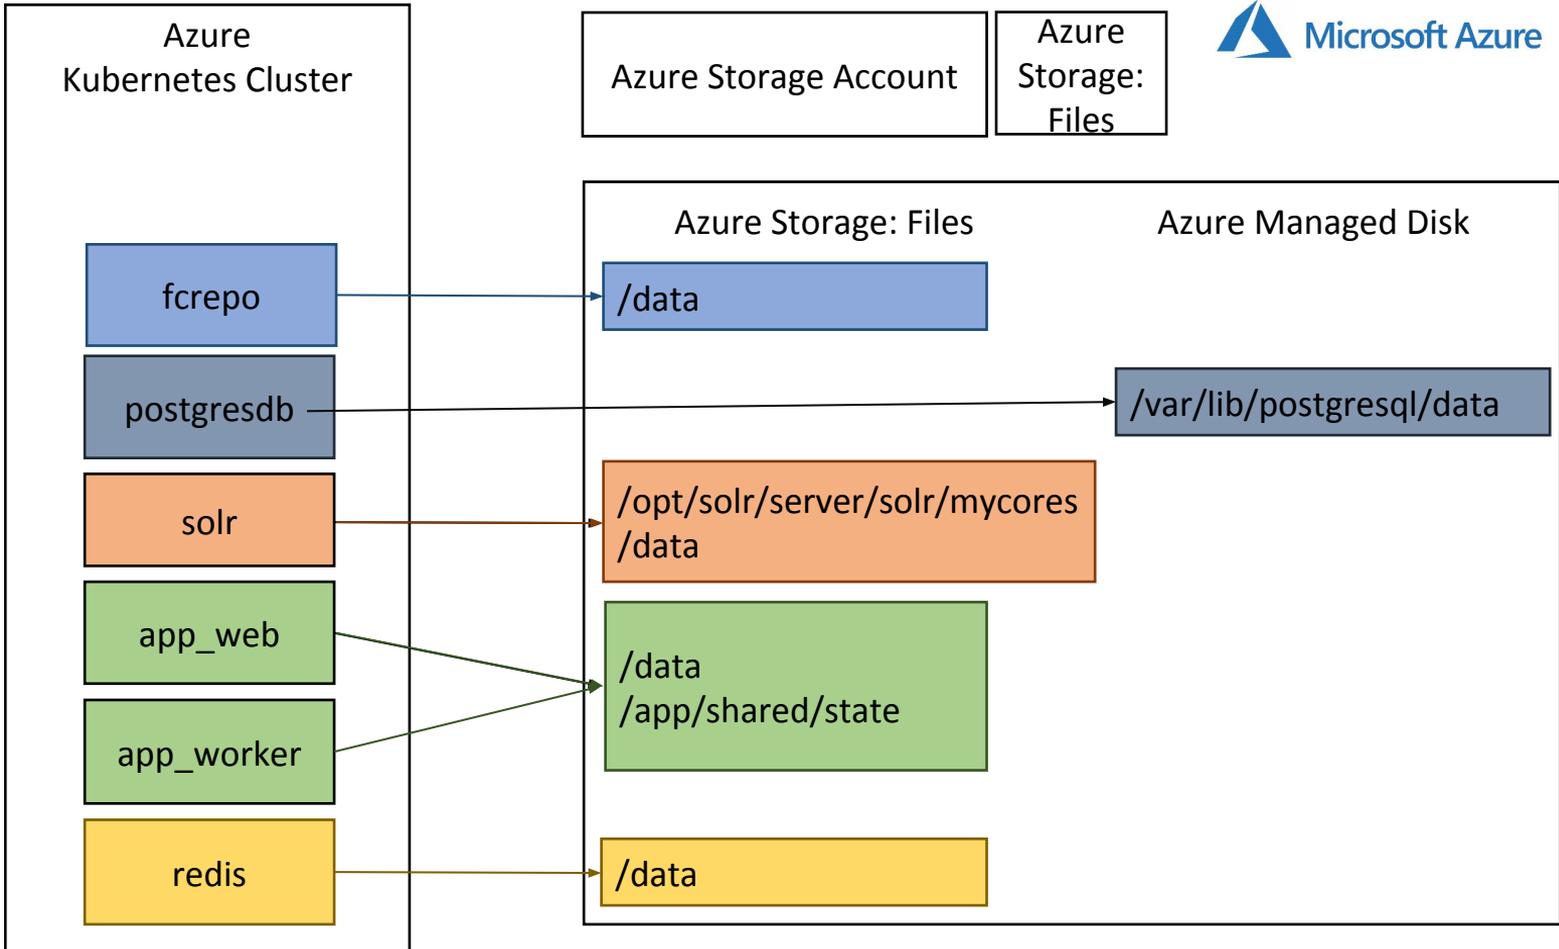

/data

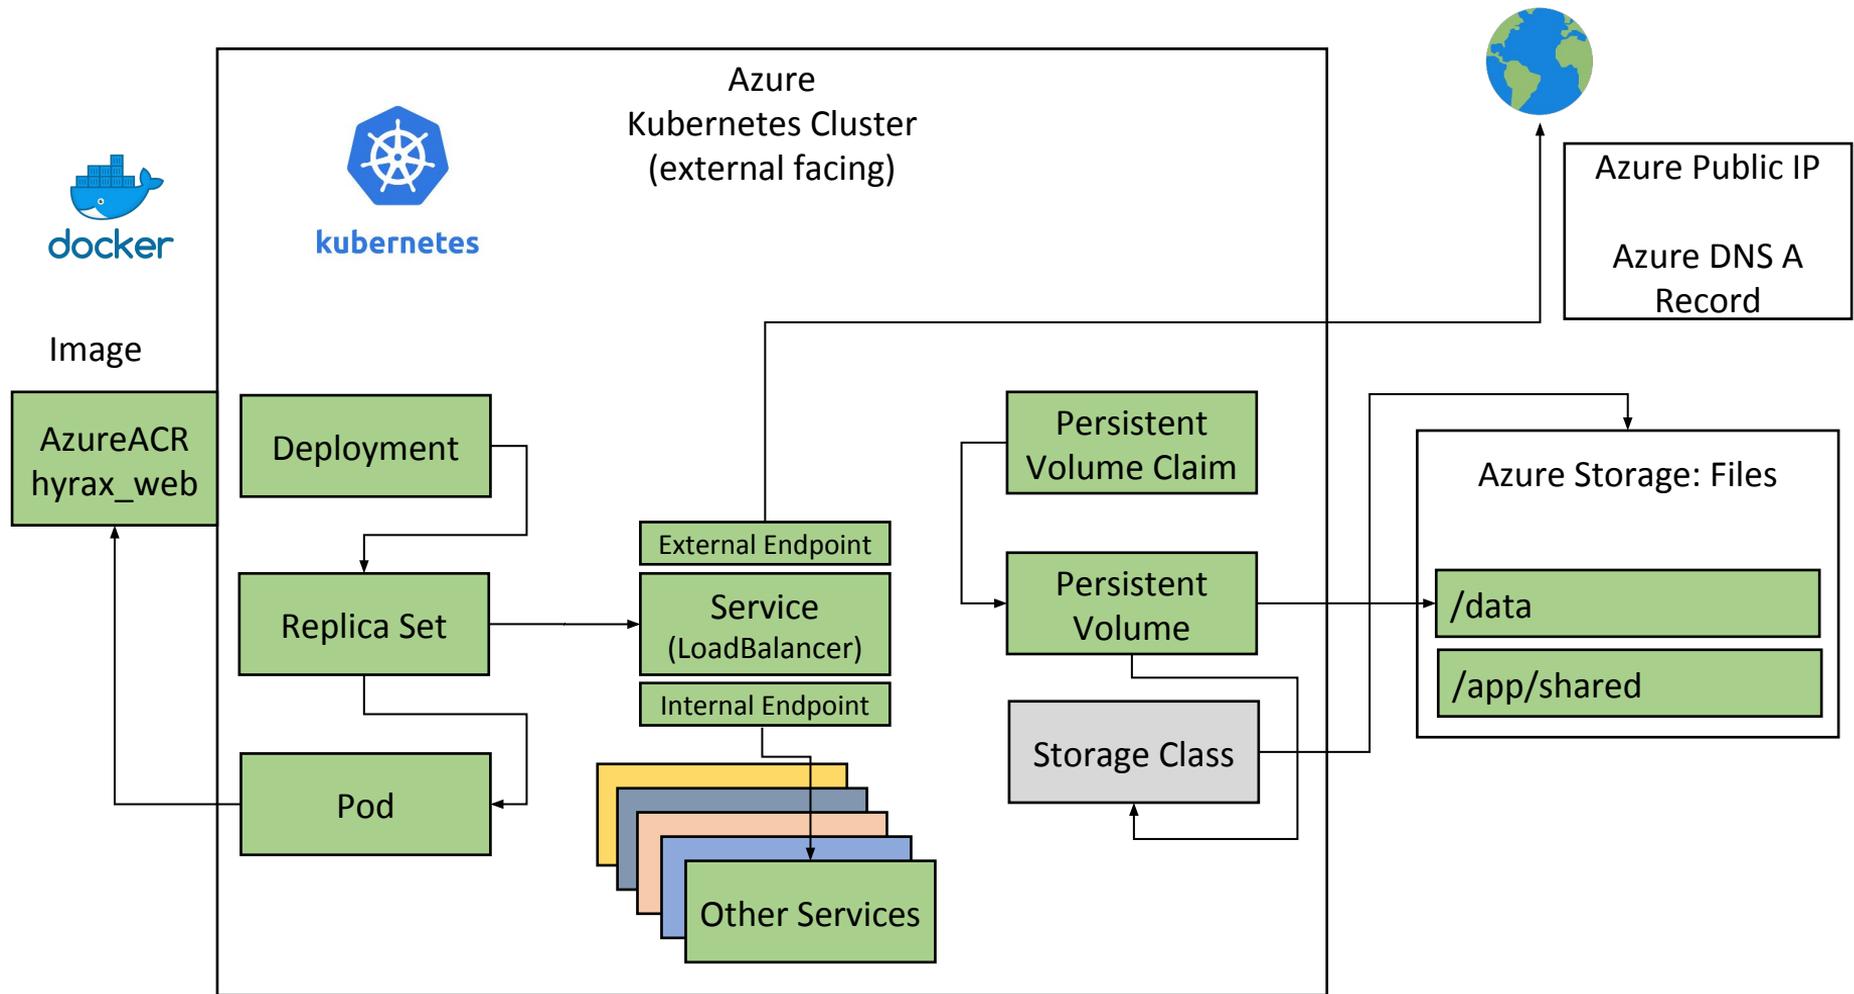

/var/lib/postgresql/data

/opt/solr/server/solr/mycores
/data

/data
/app/shared/state

/data

Create Resource Group 

Create Storage Account 

Create Storage Share 

Create Container Registry (ACR) 

Tag and Push Docker Images to ACR 

Create Automation Account 

Create Log Analytics Workspace 

Create Cluster 

Create Secrets 

Create Public IPs 

Create DNS Zone A Record 

Create Storage Classes, PVCs and PVs 

Copy Solr Config to solr:/data 

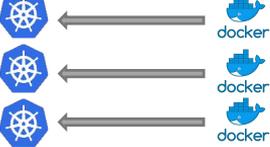

Create Deployments and Services 

Create Postgresdb, Solr, Redis 

Create Fcrepo 

Create Web and Worker 

Manual (pre terraform on local CLI)

Build Docker Image for the Hyrax App using
`docker-compose build`

Manual (post terraform on Azure Portal)

Deploy VM Start | Stop
Solution in Automation
Account

@todo

- Use remote-state
- Make running docker-compose build part of the terraform apply
 - Delay kubernetes deploy for hyrax/sidekiq until it's finished
 - Initiate only on a change in git revision/tag
 - Circle CI?
- Endpoint Security
 - SSL for the public endpoint(s) ✓

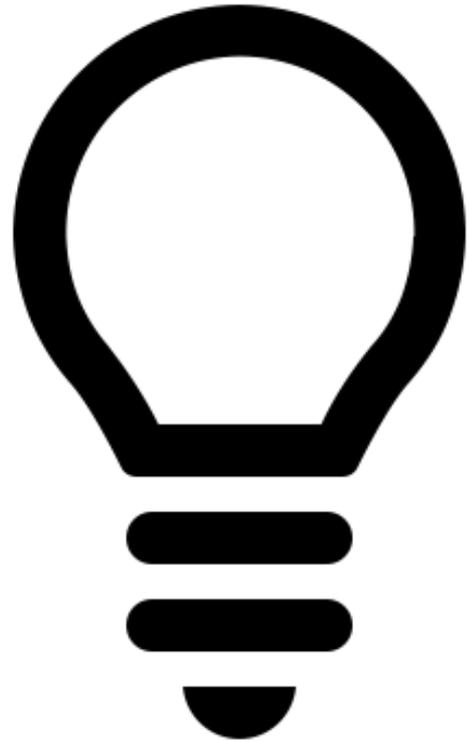

Controlled Vocabulary Options in Hyrax

-Julie Hardesty

Samvera Virtual Connect 2019

Proposed idea:

**Include more
controlled vocabulary options
for Keyword and Subject fields
by default in Hyrax**

	A	B	C	D	E
1	Name	Year	Creator/Community	Classification Scheme	Controlled Vocabulary
2	Indigenous/Native			<input type="checkbox"/>	<input type="checkbox"/>
3	Brian Deer Classification Scheme	1977		<input checked="" type="checkbox"/>	<input type="checkbox"/>
4	Mashantucket Pequot Thesaurus of American Indian Terminology			<input type="checkbox"/>	<input checked="" type="checkbox"/>
5	BC First Nations Subject Headings - Names			<input type="checkbox"/>	<input checked="" type="checkbox"/>
6	Native American Educational Services system (NAES closed in 2007)		Native American Educaional Services College: https://s	<input checked="" type="checkbox"/>	<input type="checkbox"/>
7	Ojibway-Cree Cultural Centre classification (mod of BDC)			<input checked="" type="checkbox"/>	<input type="checkbox"/>
8	National Indian Law Library Thesaurus			<input type="checkbox"/>	<input checked="" type="checkbox"/>

Vocab Options

- Many available
- Not many Linked Data
- Discussion needed (community and technical approach)

9	Indigenous Materials Classification System			<input checked="" type="checkbox"/>	<input type="checkbox"/>
10	NB/C Classification		2015 Union of British Columbia Indian Chiefs Resource Cent	<input checked="" type="checkbox"/>	<input type="checkbox"/>
11	LGBTQ+			<input type="checkbox"/>	<input type="checkbox"/>
12	Homosaurus.org based on International Homo/Lesbian Informaticentre & Archives and compiled by Jack van der Wel (with support of Ellen		http://homosaurus.org/contact	<input type="checkbox"/>	<input checked="" type="checkbox"/>
13	International thesaurus of gay and lesbian index terms from the			<input type="checkbox"/>	<input checked="" type="checkbox"/>
14	Lesbian Index Terms by Van Staaldouin		1997 IHLIA LGBT Heritage	<input type="checkbox"/>	<input checked="" type="checkbox"/>
15	Gay Studies Thesaurus		1990	<input type="checkbox"/>	<input checked="" type="checkbox"/>
16	LGBT Life Thesaurus from EBSCO (maybe called GLBT Thesaurus?)		2004	<input type="checkbox"/>	<input checked="" type="checkbox"/>
17	Sexual nomenclature - a thesaurus		1976	<input type="checkbox"/>	<input checked="" type="checkbox"/>
18	LLACE Classification Scheme		2001 Lavender Library, Archives, and Cultural Exchange of S	<input checked="" type="checkbox"/>	<input type="checkbox"/>
19				<input type="checkbox"/>	<input type="checkbox"/>
20	Women			<input type="checkbox"/>	<input type="checkbox"/>
21				<input type="checkbox"/>	<input type="checkbox"/>

Interested? Let's Unconference!

Scholarsphere is Dead, Long Live Scholarsphere!

Adam Wead

awead@psu.edu / [@amsterdamos](https://twitter.com/amsterdamos)

PennState

Here lies
Scholarsphere

2012-2019

Post Mortem

- Upgrading to Hyrax is problematic
 - Performance
 - Valkyrie integration is still forthcoming
 - Could require a migration
- Unable to update existing dependencies (ex. jQuery)
- Adding new features is limited; requires excessive effort
- Developer unhappiness
- Developer departures (unrelated to happiness)
- Difficulty finding part-time contractors
- Institutional upheaval: reorgs, mergers, & a new everyone

Scholarsphere Resurrected

- Focus on research data and scholarly publication (ex. Zenodo, Dryad, Figshare)
- Same data model & metadata
- Smaller application: minimal, standard dependencies (no Fedora)
- Distributed, scalable architecture with a *microservices-esque* approach
- Leverage new storage options such as AWS and Globus
- **All functions are backed by an API to support researchers and migration**

Current Status

- Finished six-week experimentation period deploying sample applications with 2 devs and 1 devops
- Rails 6: Postgres, Solr, Webpacker, Stimulus.js, Blacklight
- Metadata: JSON with Postgres (similar to Valkyrie)
- Storage: Amazon S3 via Shrine with Uppy.js
 - Tested 30 GB files for resumable, multipart uploading
- Jobs: Sidekiq, Amazon lambdas for derivatives (?)
- Deployment: DroneCI, Docker, Kubernetes
- First production release in early 2020

It's not you, it's me

- No, we're not leaving
- Samvera is a community, not software
- Hyrax, Valkyrie, and Fedora have a future at Penn State
- We don't know what that future is yet
- Breakout proposal: *I know, Let's Build an API!*

Thank You!

Questions? Come find me and let's talk more...

Notes & Shout-Outs

Zenodo: <https://zenodo.org>

Dryad: <https://datadryad.org/stash>

Figshare: <https://figshare.com>

Example Shrine integration: <https://github.com/psu-stewardship/ss-shrine>

Data model sketch: <https://github.com/psu-stewardship/ss-json>

Current repo: <https://github.com/psu-stewardship/scholarsphere-4>

Thanks to WUSTL for hosting and to the SamveraConnect committee.

Thanks to my colleagues at Penn State Libraries for being awesome!

Work Estimation Records

How we're using agile practices to improve our teams estimates

Aaron Collier (Stanford)

aaron.collier@stanford.edu

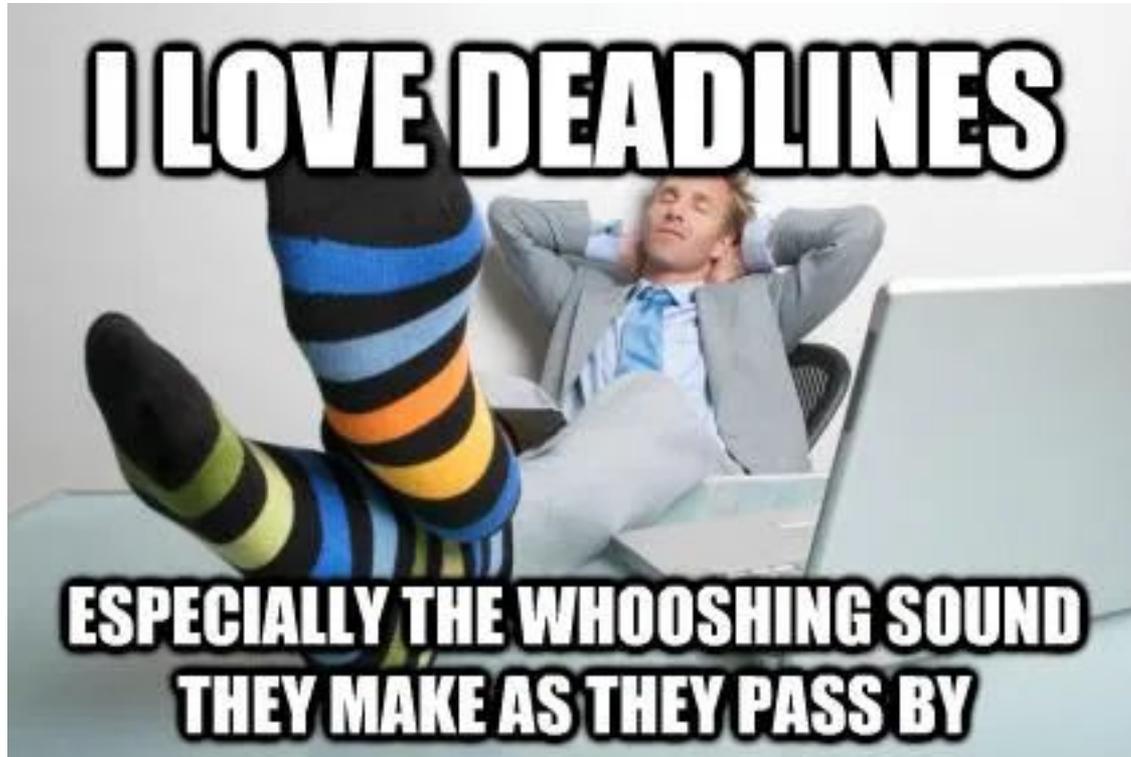

@aaronisbrewing

DLSS Infrastructure Team

- Naomi Dushay
- Mike Giarlo
- Justin Coyne
- Justin Littman
- John Martin
- Jeremy Nelson
- Peter Mangiafico
- Astrid Usong
- Aaron Collier

Why are we here?

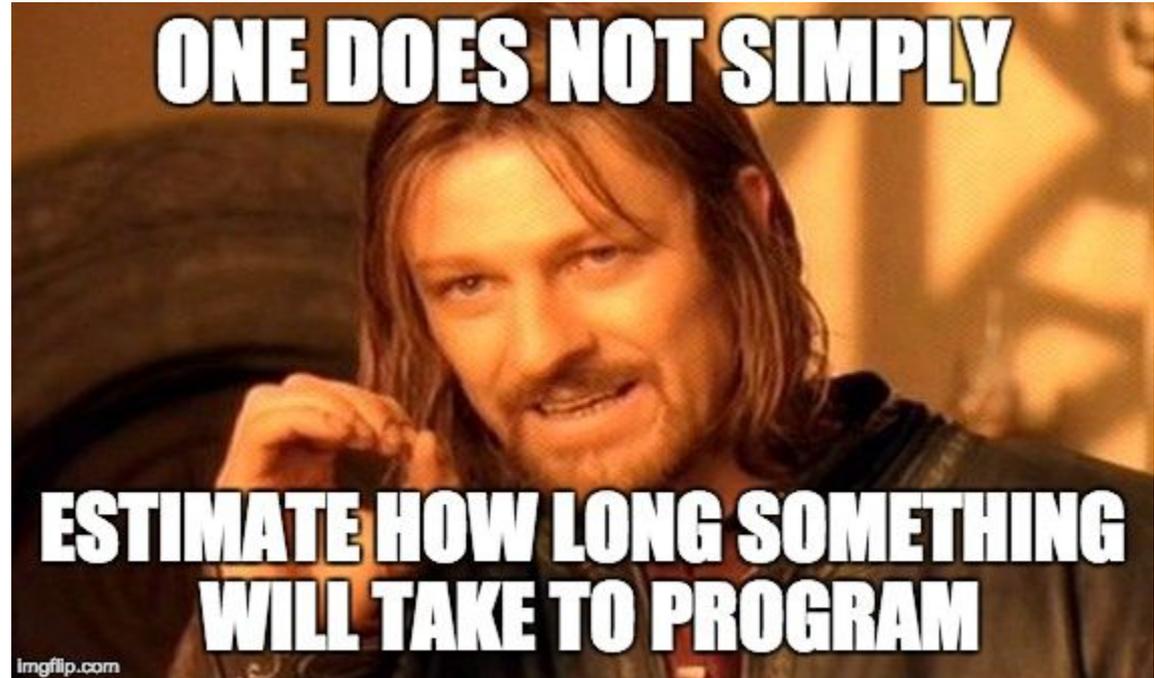

Software estimates are easy /s

Software engineers can be bad at estimates...

But it's worse when arbitrarily time constrained.

Architecture Decision Records

Work Estimation Records

Guidelines we are following

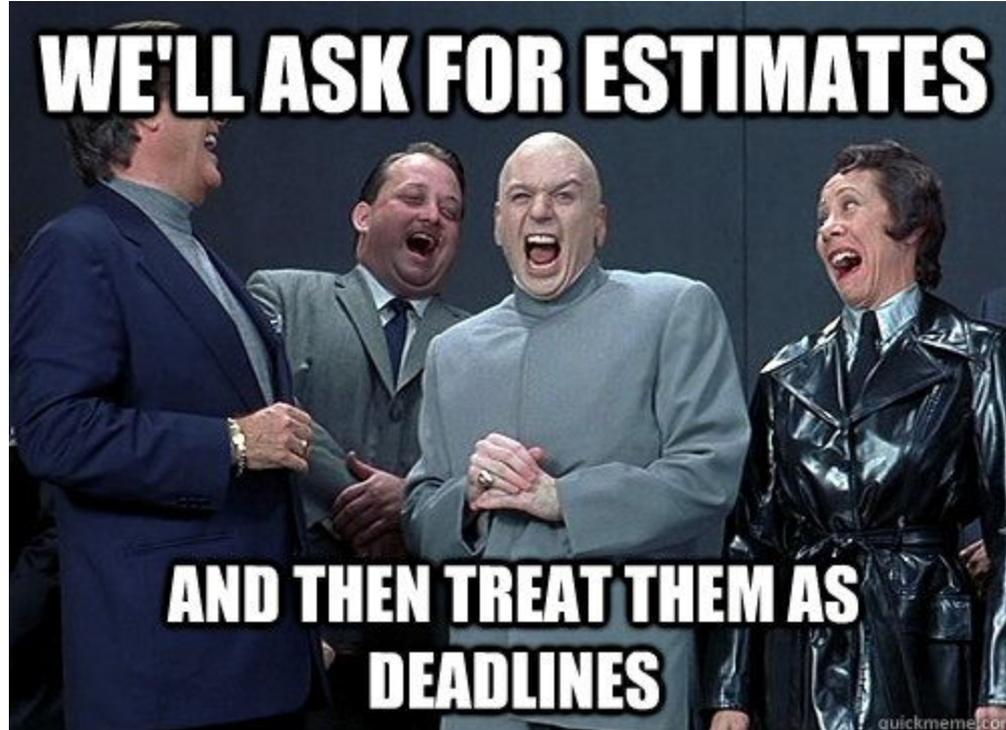

- Capture the who, when, and why an estimate is requested
- Capture the who, confidence, and effort of the estimate
- Capture assumptions used in the estimate
- Outline the major tasks
- Risks/Challenges/External Dependencies
- Open questions
- Time estimate based ranges are followed
- Results (when possible)

Making this Agile

- Two (or more) team members use a pairing session to write the estimate
- A pull request is submitted to the team for discussion
- Iterate on the estimate (and the template)
- Retro the estimate when completed (TBD)

How is it going?

Advancing Hyku Project

-Brian Hole

Welcome to University of Shattuck's digital repository, Hyku

The Hyku repository is a digital archive for the University of Shattuck. It has been designed to hold, manage, preserve and provide access to a growing body of digital material generated through the research, teaching and administrative activities of the University.

Supporting & Connecting Women in Technology

-Robin Ruggaber

AnitaB.ORG

- Mission
 - “At AnitaB.org, we envision a future where the people who imagine and build technology mirror the people and societies for whom they build it. We connect, inspire, and guide women in computing, and organizations that view technology innovation as a strategic imperative.
 - Our social enterprise supports women in technical fields, as well as the organizations that employ them and the academic institutions training the next generation. A full roster of programs help women grow, learn, and develop their highest potential.”

Founder

- Community (international, restricted to women, and safe)
 - 1987 Anita Borg plus 12 like minded women enrolled in Anita's vision
 - Syster - social infrastructure
- Grace Hopper Conference
 - 1994 Anita and Dr Nelle Whitney established an annual Grace Hopper Conference in honor of Grace Hopper

Community

- Systems (primarily mailing lists but also online infrastructure)
 - international, private to women technologist, and safe
 - representing 6000 women, 60 countries, 50 Academic Institutions and Fortune 500 Companies
 - Supporting various affinity related to culture, place and facet of technology
- Career Support
 - curriculum for career guidance
 - continual research to identify top companies known for equality
 - job boards
 - Grace Hopper Conference - annual, multi track, showcasing women's technology work and innovations, connecting women

What about all the men
interested in supporting us?

Check out the Ally Curriculum

Iterating on a Hiring Process

-Jeremy Friesen

Guiding Principle

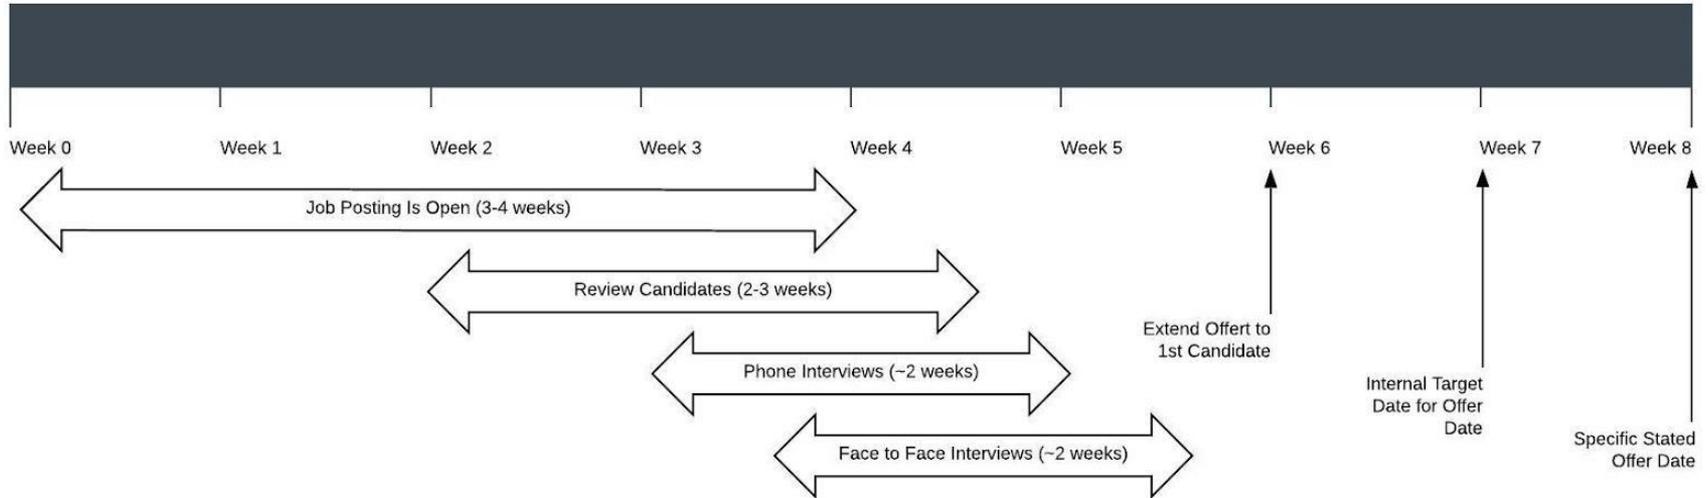

Treat hiring a new employee as your most important project.

Roadmaps and Quorum

8 Week Hiring Timeline

Job Posting ≠ Position Description

Write a job posting that reflects your organization's aspirational best days

Create a Rubric

Before you get started, determine your measurement criteria.

Communication

Send your phone interview questions in advance and require written responses in advance of their phone interview.
