A Samvera Internship

New to coding, new to the Community
Notch8 and LEARN Academy

The Internship Program
The Internship Program

- Web Development Consultancy
- Founded 2007
- Sister company to LEARN
- Internship partner

- Web Development Bootcamp
- Founded 2015
- Sister company to Notch8
- 4 month program
- 3 months of lecture
- 1 month internship
The Project

Bulkrax gem, for bulk import/export.
Why did we pick Bulkrax?

- Immediate needs are UI based, not deep Samvera
- Good payoff - Interns can see their work in action
- Incorporates intern experience with a lot of the Notch8 team
- Open source
April, Jeremy, and Ruben

Our Team
April

Strengths and Goals

- Graphic & web design, and frontend languages
- Create a feature for my portfolio, contribute to open source, and give back to the Community
Jeremy

Strengths and Goals

- Contribute to open-source Codebase
- Develop through an agile process
Ruben

Strengths and Goals

- Build a feature for his resume/portfolio
- Ask more questions
Learning Samvera

Pitfalls, Struggles, Growth, and Achievement
What was your introduction to the Samvera community like?
What were some of the struggles of jumping into the technical side of Samvera?
The Project

Goals and Tasks
Demo

What our Team Accomplished
Takeaways

Revisiting Goals with New Perspective
"What was it like working in an Open Source stack?"
“Has your experience working with Samvera affected your goals? If so, how?”
Thank you!
