

Habitat of the AIPs

A photophilous species, the ravenous Consumer thrives on rich content nurtured by the Curating Hyrax within the territory of the AIP

Species and vegetation thrive in the abundant light

Lux reperiens

The Mediating Hyrax shares terrain with its near cousin, the Curating Hyrax, and artfully co-habitates with The Self Depositing Badger

Hyracoidea arbiter

Hyracoidea curator

Dodging the Self Depositing Badger, the Curating Hyrax keeps a watchful eye on the AIP and cultivates the terrain to the benefit of all inhabitants

The great AIP rules supreme in intelligence, strength, and endurance

Fascis princeps

Mellivora capensis depositor

A bold and vocal species, the Self-Depositor is not concerned by the presence of the great AIP, and freely goes about its business
